### LOCAL NEWS ITEMS

Mr. and Mrs. John Jacobson have been down from Calgary for a short stay.

The annual conference of secretary treasurers of municipal districts will be held at Sandstone Hall, Calgary, on March 22 at 9 o'clock.

Stationmaster Craig is not quite one hundred per cent. in health, and is taking a few days off to have the physicians look him over.

Miss Elsie Kehr, who is on the office staff of the Municipality of Riley, at Cayley, came over to Vulcan for a holiday and is being entertained by friends.

A farmer became the father of twins, and on learning the news he was so delighted that he hurried to the nearest railway station and sent this telegram to his sister-in-law: "Twins today. More tomorrow."

Mr. Bud McKie was the winner of a little snooker tournament at the Club billiard hall this week, at the finish playing nine games in succession without a loss. He is a contestant in the big event which is proceeding, with some thirty or more entries.

Two rinks of curlers came over from Nanton on Monday night with the school hockey team, and having the same luck as their youthful puck chasers, they won a double rink competition, both rinks finishing ahead of the home quartets.

The boxing card at Lethbridge, in which our local batter, Jimmy Mahon was to figure as a principal, has been called off on account of some unavoidable circumstance. But he will get his chance some time. In the meantime Jimmy is open to meet any welterweight in the province.

Mr. Roy Jacobson was the victim of a recent accident, the result of which will interfere with his locomotion for a time. With a pair of skis on his feet he was skimming along behind a car, when a bump gave him a roll and the result was a broken leg. He does not lack spirit, and will be hoping about even before some will know of his accident.

English slang is as unintelligible to us on this side of the water, as our slang is to the Britisher. "Swell" are called "nobs" or "what-what."

Anyone out walking is doing "the ball and chain." Talkative folks "blow the gaff." A girl is a "black pearl." "French paste" is a term for the face. A Londoner's club is often called "bath and tub."

Giving anything the once over is "pot and hook."

Since the first of March steady winter conditions are prevailing after a few weeks of mild and pleasant weather, and there are no present prospects of a change. This as regards the local town territory while reports come to us today that in the foothills summerlike conditions are generally prevailing. Little if any operations on the land have as yet been attempted to gather the standing stocks of grains or attempt threshing.

There is plenty of ice and some little snow yet on the fields and it will be some time before this work can be started. Considerable damage or loss to grains in the fields are reported by field mice and other animals who have found good feeding places throughout this long winter. More wild ducks are here hibernating than for many years on this account and are waxing fat on the good feed. It is expected, that on account of the lateness in possible harvesting, the acreage of grains for the coming year will be considerably less than the average. From one-third to a quarter of the crop is yet to be threshed.

A town has no place for the knocker; a knocker is hardly a man without a country, but his country, his town, or his community has little use for him. There are all kinds of knockers—as many as there are kinds of people. The thriving city is filled with boosters—boosters who outnumber the knockers that their knocking does not count for much. We like the boosters. Sometimes they are super-enthusiastic, or, rather, over-enthusiastic is the better word. But they are always enthusiastic for their home town or the cause in which they are interested, and they are never to be found hanging around somewhere knocking this and knocking that. No, a booster is not built that way. We must have these boosters; they are just as necessary to the successful enterprise as daylight is to the earth. Knockers are found everywhere, just the same as the boosters, but, let us all be thankful for it, the boosters are always far away in the lead; usually, the knockers can be found in the rear, where it is safer for them, perhaps. They flock together, but even then they fail to make a crowd, as a rule. But the greatest booster is he who converts the knocker into a booster—"makes him see the light"—so that both play the game as team-mates ever after. A town has no place for the knocker—it matters not whether he knocks the town, its enterprises or its citizens. Show us a man who knocks his fellow-citizen and we will show you the poorest excuse for a citizen extant.

### LOCAL NEWS ITEMS

A hick town is a place where \$50,000 can cause a severe case of swell head.

Blessed are the poor.—They get up early enough to enjoy these beautiful mornings.

Rev. George Webber, of Vancouver, will preach at both services at the United Church on Sunday.

Born, in Vulcan, on March 3rd, 1928, to Mr. and Mrs. William McKenzie, of Vulcan, a daughter, Beulah Doreen.

Mr. and Mrs. C. B. Shimp and little daughter have returned to Vulcan after a couple of months spent in California. All three are looking fine.

Rumor has it that the C.P.R. will improve the Vulcan depot to the extent of an addition to the waiting room. This is not enough, so say the people about town.

Mr. Norman Wilks, the famed pianist was this week a guest at the home of Mr. and Mrs. Roy Walker. The Advocate was pleased to have a call from the gentleman.

Col. S. P. McMordie, mayor of Prince Rupert, while on the return from a business trip to Ottawa, stopped off at Vulcan, and was a guest at the home of Mr. and Mrs. A. T. Martin.

An addition is being made to the business place of Mr. H. Daines, the purpose being to make room for a bigger and better stock of boots. Several interior alterations will be made to improve facilities for the handling of footwear.

The Masonic lodge at Vulcan, on Tuesday night, received the official visit of the District Deputy Grand Master, W. R. Rogers, of Lethbridge. It was a pleasing and profitable lodge event, and following the business of the session there was refreshments with entertaining speech and song.

The boxing game has lately become popular in Vulcan, and now comes a challenge which will perhaps create an interest in wrestling, and The Advocate gives it place as a contribution to sport. Paul Paulsen, who is making his residence in Vulcan, challenges Allred, of Lomond, or any man not exceeding 158 lbs., for a wrestling match, at any place, and at any time.

The Vulcan theatre has of late been offering a rather exceptional variety of entertainment, and now comes the announcement of the engagement of Val Halle and company, presenting "The Goblins' Paradise," the ten thousand dollar mystery show. They have a Hawaiian quartette, and artists to provide the comedy and the unusual sketches. The admission is 50 cents for adults and 25 cents for children, and the company calls them sensible prices.

Vulcan Women's Institute met in the United Church parlors, on March 2nd, with a good attendance, and the meeting opened by repeating the creed and saluting the flag. Plans were made for the annual St. Patrick dance, to be held on March 16th. A very interesting talk on "Prevailing Diseases" was given by Dr. Carson. Community singing led by Mrs. Campbell and Mrs. Smith, was thoroughly enjoyed by all present. A hearty lunch was served by Mrs. Walker, Mrs. McClintock and Mrs. Martin.

Mr. C. B. Shimp has been officially commissioned as the representative in Vulcan of the Ko-Top Oils Limited, a company possessing leases in the famous Montana field as well as in Canadian territory adjacent to the Turner Valley. The company has been well organized and their proposition commands consideration as an investment. Mr. W. J. Douglass, who is perhaps best known locally as a political candidate a few years ago in Bow River riding, is the president of the company and managing director, and those who know him will at once realize that the company will have an energetic and competent official. Mr. Douglass was in town for a day or two on the business of the company, and the securing of a local representative was a part of this.

It took four games of strenuous hockey to determine the difference in the Vulcan and Nanton high school hockey teams, and the deciding game was here on Monday night, and the margin was only two goals, and these were in favor of Nanton, and no one discounts the victory. The series created quite an interest in both teams, and the manner of play, and the sincerity of effort on the part of the boys provided hockey entertainment which had favor with the fans. The excellent performance of the local lads had weekly mention in these columns, and to this can now be added a recognition of their sportsmanship and good grace on the occasion of defeat. They certainly play the game as it should be played, and their sportsmanlike conduct is commendable and manly. The boys who constituted the line-up in the last engagement, which will perhaps be the final of the season, were Harland Schenck, Russell Collier, Herb Linley, Bob Marshall, Theron Vaughn, Harry Ferguson, Elwood Lebeau, Harry Purdy and Harold Hemingway.

### LOCAL NEWS ITEMS

A hypocrite is a man who can't even believe what he hears when he talks to himself.

Mr. Charlie Burkett, of the C. P. R. station staff, has been transferred temporarily to Carmangay.

Mr. John Dorsey, one of the boys of the hockey squad, will stay with us as a resident for some time, having accepted an engagement as teacher at Sandpit school.

K. R. McLean, sight specialist, 212 Herald Building, Calgary, desires to announce that he will make his monthly visit to Vulcan, at King's drug store, Saturday, March 31st.

The plan of the street levels in Vulcan, prepared on order of the town council, has been delivered, and hence forth these will be a consideration in connection with building operations, at least in the main business section of the town.

Vulcan will be well represented at the District Conference of the Women's Institute, being held this week in Lethbridge. Mrs. Frank Clark is a delegate of the local branch, Mrs. A. T. Martin represents the Little Bow constituency, and Mrs. Jack Marshall as secretary of district conference.

Word has been received from Lacrosse, Wis., of Mr. Edward Herman having undergone a serious operation at a local hospital. His recovery, according to surgeons, seems favorable, and he expects to leave the hospital in the near future. Mr. Herman is a brother of Mr. William Herman of McGregor district.

This is the season of sales, as the advertising columns would suggest, and Auctioneer Rebbe is booking them up at a rapid rate. Those that have already been held have proved splendidly successful, and indicate a decided advance in horses. Included in the number now billed will be the community auction on Saturday of next week, to which all who have anything to sell are invited to make contribution.

The message comes by wire of the passing of Michael B. Kuykendall, at the family home at Kiser, West Virginia. Messrs. Edwin and Loss Kuykendall, well known residents of the Vulcan district, are sons of the deceased, and the latter has but lately returned from a visit to the old home and during the illness of the father. Deceased was eighty-two on December 9th last. He had never been to Alberta.

When a town dies, there isn't any funeral, there are no flowers, not even all bearers—it just dies. When a town dies, somebody or many somebodies have failed to administer the dosages of civic pep and pride. When a town dies the trains run on past it, the sidewalks revert back to their native element, the birds build their nests in the town hall, the cattle graze in the public park. It's a sad and sorry thing when a town dies that hasn't even the satisfaction of knowing who killed it. But when a town dies, it just dies, and dies and dies, and believe us, it's a dead one.

**THE VALUE OF A HOME**

Although there are catalogued nine teen ways of being a poor parent, we who struggle to avoid some of the pitfalls of parenthood—feeling that we fail—must not be unduly discouraged. Investigation made in the Los Angeles Juvenile Courts show that almost any parent is better than no parent at all. In a dozen cases taken for particular examination, nine cases out of the twelve come from broken homes. In three of these nine, the father was dead, in six the parents were divorced. Remembering this, the well-meaning but discouraged parent, had just better stick round home awhile yet. His children's chances are better that way. These investigations have proved often to the chagrin of social workers, that children will fight to any length to get back to their home—even bad homes. It is surprising how little grudge a child bears at being too harshly treated. He turns back, out of all reason, to his own. Though there are then, nineteen separate ways of being unjust to a child, the worst of all is to deny him a refuge. If we can give the child a sense of security against the world, in his home; we have given him the best foundation possible. How to accomplish this? Let a parent ask himself what makes him feel secure. He must have love. He must feel wanted. His material surroundings must be stable, his place established. The young child attains security by resting against the encompassing protection of his parents. All delinquent children lack this. The one generalization that is made in the life stories of delinquents is that they have known insecurity, harshness, strains in early childhood. Secure the child against the outside world by giving him a home. Secure that home, by keeping it peaceful. And minor mistakes escape the youthful notice. Your children's future is comparatively safe.

**DEPLORABLE DEATHS**

The heart-breaking tragedies which have occurred within the last few weeks at Claresholm, Blackie and High River, through meningitis, give parents great food for thought and speculation. In four cases the dread disease struck down active boys of fifteen and sixteen. There may be no significance in this fact, and yet the mind returns to it. And with the return comes the question as to why this age should be especially susceptible. Are our children so actively engaged that they are without reserve strength. There is no denying that the combined rush of activities, in which the 'teen age is engaged, is depleting. Each separate activity is wholesome and beneficial in itself, and yet all combined an aggregate is piled up that encroaches too greatly into sleeping hours. They are at a constant tension and parents are hard put to it to know where to draw the line, because, as we have said, each separate engagement is commendable. In an article which we printed a few weeks ago, an authority stressed just this point, that lack of sleep, too great excitement, unnatural strain, were all factors that made the 'teen age susceptible to these obscure and terrible diseases.

Pussyfoot Johnston has called a conference for world prohibitionists to meet in Africa. The condition of the Sahara would no doubt make him optimistic.

It is said that the next war will cost the U.S. five hundred billion dollars, and probably Tex Rickard will stage it.

Considerable ferment is being caused by the prohibition question in Congress.

A cynic is a man who mistakes cheerfulness for ignorance.

**GONE IS THE ATTIC**

The days of the attic genius are passing. In times past, some of the greatest inventions were brought into being actually in attics. It was in a hot garret in Boston in 1875, that Watson and Alexander Bell got their first ideas for perfecting the telephone. Whitney wrestled alone with the cotton gin, for separating cotton fibres from their seed, carrying on his work in humble surroundings. Samuel Morse of the electric telegraph reserved one corner of his attic bedroom for a laboratory, and under great privations perfected the Morse code. A tool shed was the setting for the making of McCormick's reaping machine. Edison invented the incandescent electric lamp in the crudest of one-room shacks. Goodyear wrestled wherever he was allowed to pause, to discover the process of vulcanizing rubber. His story is a terrible one of privation, ill health and humiliation, before he finally achieved the wonderful vulcanizing process. But now, research laboratories have taken the place of lonely, out of the way corners where inventions plugged away alone. The man with the inventive trend, can readily find an equipped laboratory in which he may pursue his road. A smoothed path now lies before an inventor, where formerly privation and suspicion were his lot. Never was a time when such marvelous inventions were in constant state of being. Yet never was a time when invention had less personality and color.

**DOMESTIC AFFAIRS**

There is a Scotchman in this town who has a golf ball, that he estimates to have hit, or hit at, 18,000 times. Now this man has a pretty taste in figures and we would like to encourage him in collecting a little real data. For instance, how many times in the year does the mother of three babies wash faces—just a minimum? How many pairs of boots, rubbers, overshoes, moccasins and running shoes, does the father of four children have to buy in a year—and incidentally what footwear does father manage to get for himself? How many cakes does the ordinary mother bake in a year for school functions, church societies, lodges, guilds and community affairs that are a feature of the local life? How many volts of energy are expended in a year by the mother of a ten year old in persuading him to wash behind his ears every morning? To what point of exhaustion must parents be reduced, before agreeing that after all, daughter may go the dance? How many calories and vitamins does the mother of five children, all hungry, manage to get into herself in 365 days—or is it that an unseen power nourishes her? How many times does father say "I'll trim you, young man, if you aren't home to supper on time tomorrow night?" And he never does.

**NEWSPAPER TALK**

When one reads an unusual news story about somebody who proposes to perform an unheard-of feat, the item is often viewed with skepticism, and dismissed with a shrug of the shoulders as being "only newspaper talk." And more often than not that is all it amounts to.

Files of daily newspapers of February 5, 1927, contain such an item, which it is interesting to read again in view of what really happened later. It is an Associated Press dispatch from St. Louis, in part as follows:

"A St. Louis-to-Paris airplane flight for the \$25,000 Orteig prize is under contemplation by Capt. Charles A. Lindbergh, chief pilot on the St. Louis-Chicago air mail route. Capt. Lindbergh proposes to go alone, using a small plane. The flight to New York would be made in one day. The second leg of the trip, 3,200 miles, Lindbergh believes he can make it 32 hours."

Three and a half months later that dispatch was verified, except that it took the flyer an hour and a half longer than he had estimated. The unknown air mail pilot has become the most romantic and attractive figure in the world and in the past nine months has made more "newspaper" talk than any other human being who ever lived.

Gold is one of the few things in the world that can be either a disease or a remedy.

**ALBERTA'S STAMP**

A visitor in this district recently, remarked that he was struck with the unusually candid and fearless appearance of Albertan children. Many of the children of our community are native born Albertans. Have they any "Alberta made" qualities stamped on them? Will "distinctly Albertan" be a term used in later years, to describe our growing generation? Candor and fearlessness should certainly be characteristics. Candor is in the sweep of country ever before their eyes—no lurking dangers, nothing particular to fear, and poor cover for a dark and sinister life. Tolerance and cheerfulness are products of the broad horizons and the exhilarating air.

Energy and a quick wit, acknowledged to be over the average, should be attributed to our sunshine and our altitude—a quick snapping wit, more kin to the American nature than to the mellow British humor. The boundless energy of Alberta school-children is an established tradition amongst teachers, with experience in other countries.

The petty feuds and grudges existing in isolated or crowded colonies have no place here. In fact, if our youth is conspicuous for any one quality, it is for a good-natured casual feeling of friendship toward everyone. There are no narrow deep-rooted prejudices to overcome in a new country. And it is doubtful if a breezy optimistic land such as this, can ever produce anything so static as a deep-rooted prejudice.

It has been argued that this is not a country of great spiritual life, or of high imaginative power. In lands of mighty forests and beetling mountains, man tends to walk softly before the Lord, marvelling at the mysteries and terrors of His handiwork. But on the prairies, there is so little of mystery and apprehension, that the dwellers thereon are wont to place great confidence in their own strength. They feel themselves, to a great extent masters of their fate. A practical, capable type of person is developed, little touched by immensities and little given to imaginative speculation. Nature, in a pioneer country, demands physical activity. Dwelling on the future of the children, moulded by Alberta's horizons, air and sunshine, one might suggest that for some time, they will be the doers of deeds in practical life, the farmers, the builders, the investigators in utilitarian lines. Leaving it other older, more placid lands to produce the meditative souls, the philosophers and the artists.

**WHY KEEP ON ADVERTISING?**

If the same people always lived in the same place and kept on doing the same things, then it might not be necessary to keep on advertising day after day, month after month and year after year. But they don't. Part of America's market dies every day and a new part takes its place. Families not only change their living places, but they change their buying habits. The pay envelope of today is not spent exactly the same as the pay envelope of five years ago was spent, nor will the pay envelope of next year be spent exactly as the pay envelope of this week. One advertising man has these figures about the changes that take place in the markets of the American continent in a single year: "2,500,000 babies start their earthly careers; 400,000 high school students discover that a diploma is no open sesame to a job; 1,250,000 couples decide that two can live cheaper than one; 2,000,000 families get the wanderlust; 1,400,000 people shake off the 'mortal coil.'" To play the bigger part in the markets of tomorrow you must keep in front of the public your wares today—and every day. Your goods will not interest the public unless you see to it that they do. How can you do this without keeping on advertising?—Forbes Magazine.

Joseph Shaw in further criticizing government expenditure touches on the \$18,000 upkeep of Mr. Greenfield's office in London, England. He expressed doubt as to whether the results of Mr. Greenfield's work would show fifty British families secured for Alberta—taking into consideration the competition of the railroads and steamship lines. He urged that \$20,000 might be saved the province by turning over A.P.P. duties to the R.C.M.P., using the money for old age pension. He also was in favor of curtailing University expenditure, wondering if the province at large was getting full value out of the University.

A certain girl claims she can change a tire as quickly as a man. Why not? Look at the practice a girl gets changing at-tire.

**"THE BEAVER" PROTESTS**

"Word comes from Ottawa that the new flying field being established at Ottawa is to be called "Lindbergh field." We wonder why? Lindbergh is undoubtedly a great aviator, he has proved that he has the nerve of a hero, but, after all, why should we seek to honor such a hero of a foreign country by naming the first of our flying fields after him when we have native sons who placed their names imperishably among the heroes of the Great War?"

Some one remarks that bridge would be much more pleasant if people would be dumb instead of acting dumb.

## MONTHLY REPORT

February Standing Vulcan School Pupils

Grade VIII—Robert Munro, 80; Douglas Broughton 73.6; Norma McKague 72; Robert Marshall 66; Olive Robson 65; Nelson Jamison 63; Lena McTaggart 63; Garnet Discher 62.3; Walter Ottewill 62; Royce Clark 60; Jack Anderson 57.3; Harry Purdy 51; Gwen Almond 56.6; Jean Robinson 55.5; Floyd Pritchard 55.3; Gordon Schenck 55; Irene Loiselle 53; Bruce Vanskiver 49.6; Eva Rutten 45.6; Mary Brown 40.3; Alma Shaw 40. Ungraded, Mary Craig, Clarence Martin.

Grade VII—Luella Weigh 73.5; Arlene Wallace 70; Minnie Eamor 64; Lorna Ferguson 63.6; Albert Collier 62.6; Pearl Morley 60.6; Ruth Granlin 59; Bernard Shaw 57; Jack McTaggart 50.6; Doris Hill 41.6; George Eamor 37.5; Ford Fisher 28; Clarence Loiselle 25.6; Doris Brown 23.3. Ungraded—Clifford McAskile, Leo Loiselle.

Grade VI—Harriet Simms 94; Earl Robson and George Munro 93; Edward Ober 91; Alberta Ober 90; Allan Marshall 88; Edna McPherson 86; Eleanor Jones 85; Jack LeBeau 84; George Dewie 82; Kathleen Nicholson 81; Gladys Ulrich, Betty Hunt and Marjorie Hill 80; Gordon Rutten 77; Amy Tuttle 73; Mabel Robinson 72; Ruth Grant, Winnifred Flood, Elmer Ross and John Dewie 69; Ruby Collier and Amy Tuttle 68; John Eamor 65; Charlie Carson 56. Not ranked due to absence, Doris Simington.

Grade V—Loo Jock 88; Hilton Graham and Carol Marshall 82; Billy Wright 80; Isabel Liselle 76; Ernest Linley 72; Clara Gold, George Hill and Betty Wright 70; Mervin McIntyre and Marion Morley 69; Norman Griffin 62; Cecil McKague 61; Howard Deal and Dorothy Ottewill 58; Frank Key 52; Eric Charters 51; Orton Daddis 48; Bill Kruse 47; Keith Fisher 36; Alice Adams 15. Not ranked on account of absence—Gerald Simington, Elsie Key, Fred Kruse and Alfred Benson.

Grade IV—Harry Wismer 87.6; Donald Nicholson 87; Fred Craig 85.6; Robert Langren 85.3; Kathleen Stack 85.1; Elsa Tuttle 85; Alice Carruthers 82.1; Helen Jamison 77.2; Leslie Shaw 75.2; Donald Ulrich 74.1; Phyllis Denbigh 73; Viola Brown 73; Helen Salstrom 72.8; Martha Adams 71.6; Ruth Benson 69.4; Ethel Rutten 66.2; Roy Carruthers 62.6; Mervyn Hunt 60.4; Stanley Shaw 57.4; Edna Key 56. Absent—Verne Almond, Georgia Todd Ruth Robinson.

Grade III—Ruth Peterson 95; Evelyn Peterson 94; Marie Clarkson and Harry Beingsner and Godfrey Vigne 93.5; Ellen Hill 93.2; Joyce Robson 92.2; Earl Carruthers 90.3; Catherine Griffin 89.7; Polly Fofonoff 89.5; Edith Wharry 87.5; Marjorie Schenck 86.7; Gordon Langren 86.2; Harold Bride 85.7; Lawrence Ottewill 83.7; Doris Benson 83.5; Mildred Ulrich 83; Bryson Burrows 82.7; Betty Craig 81.7; Weldon Graham 81.5; William Morley 80.7; Sophia McTaggart, Robert Parslow and Ernest Robinson 80.2; Grant Clark 78.8; Francis Shaw 77.5; Orville Roe, Madeline Beeststone 75.7; Wilma MacKenzie 72; Jeannette McQueen 68. Absent—Robert Smith, Margaret Allan, Verne Parsons.

Grade II—Hannah Clarkson 94.7; Patricia Shaw and Rhoda Scobbie 93.5; Douglas Jamison 92.2; Lenore McLaggan 90.7; Stuart Campbell 89.5; Edith Carruthers 87.2; Margaret Ish, 86.7; Marjorie Lommatsch 86.2; Gladys Robinson 84.5; Howard Spaeth 82.7; Margaret Dadds 81.3; Maxine Mutz 81; Lily Ulrich 79.7; Maxine Linley 79; Helen Wright 78.7; Catherine Arney 76.5; Billy Monkman 76; Kenneth McPherson 72; Neil Almond 71; Greta Wiersma 70; Jimmie Finnegan 69.7; Gladys Brickbank 67.7; Wallace Morley 43. Absent—Fred Fofonoff.

Grade I—Mary McClinton; Avis Deal; Glen Fisher and Gladys Anderson; Norman Loiselle; Mervin Eamor and Lawrence Market; Lawrence Beeststone; Victor Robson; Jack Denbigh; Ronald Marshall; Elizabeth Fofonoff; Monin Baptiste; Billy McKenzie; Stella Shantz; Jack Burrows; Kenneth Elvess; Anna McIntyre; Donald Campbell; Norah Collier; Laura Eamor; Annie Fofonoff; Lyall Graham; Laurence Vigne; Paddy Beingsner; Bessie McTaggart; Jimmy Keetleson; Lily Clarkson; Agnes Fredrickson; Norma Becker; Arnold Fredrickson.

Neal Hart a western movie actor, has been spending a week with Guy Weadick. He has been looking over locations for moving picture scenes.

Entry was made for 2,145 homesteads and 184 soldier grants in Alberta in the fiscal year, 1926-27 and in the same period patents were issued for 2,337 homesteads and land grants. In all of western Canada entry was made for 5,760 homesteads and 468 soldier grants patents were issued for a total of 5,543 homesteads and land grants.

## ITEMS OF INTEREST

A three week's short course in creamery operation has been offered by the Alberta University and Department of Agriculture. Classes will commence at Edmonton, Monday, March 12. No tuition fees will be charged.

The contract for the erection of the new telephone office building at Blairmore to replace the one destroyed by fire last December has been awarded to S. A. Turner, of Medicine Hat. Work will commence shortly on the new building, which is to be of brick veneer construction and of an attractive bungalow style.

The total output of Alberta coal for 1927 was 6,936,780 tons, which is 27,857 tons greater than the previous record year, 1920, when 6,908,923 tons were produced. The 1927 production exceeds that of 1926 by 427,872 tons. There were 11,639 persons employed in Alberta coal mines during the month of December 1927, which was an increase of 274 over the number employed during the corresponding month of 1926.

Alberta farm lands in occupation in 1927 are valued at an average \$28 per acre as compared with \$26 per acre in 1926. This valuation includes both improved and unimproved lands, as well as dwelling houses, and farm buildings. This report gives an average for all of Canada as \$38 per acre as compared with \$37 in 1926, and \$38 in 1925. The 1927 figures for the other provinces are given as follows: British Columbia, \$89; Ontario, \$65; Quebec, \$57; Prince Edward Island \$41; Nova Scotia \$37; New Brunswick \$30; Manitoba \$27 and Saskatchewan, \$26.

Airplanes are now being used to herd vast numbers of reindeer in the big Arctic stock farms, according to Ralph Lomen, pioneer of the reindeer industry of Alaska. "It is a new idea and it's not being practiced regularly but herding by airplanes seems feasible," said Mr. Lomen. "Our head herdsman went out recently and in two hours accomplished as much as would otherwise have required a week with six men. There is room for 12,000,000 reindeer in the northern tundra of Canada and such a herd would be worth \$50,000,000. It could be done in 50 years if Canada started now in a modest way."

Mussolini's iron fist has now cut into the Roman holidays. Rome, the city of feast days and celebrations, is being revolutionized, and now there are to be no more holidays there nor in all Italy, with an occasional exception on Sundays. The edict says: "Neither in Rome nor in all Italy are there to be ceremonies, manifestations, celebrations, inaugurations, anniversaries and centenaries, either large or small, nor speeches of whatever calibre." In the Augustan age, the pleasure-loving Romans established a record in holidays, which has continued to the present age. And this last blow of Mussolini's is the cruelest cut of all.

Some eight hundred individuals in Alberta who intend to start fur farming on slough and lake front lands owned by the Dominion Government, are now waiting for final action at Ottawa, it is announced by Honourable George Hoadley. Negotiations which have been going on for some time between the Provincial and Federal Governments as to the basis upon which licenses of these lands will be given to the Province by the Department of the Interior, have now reached the point where applications for sub-leases to this step will be taken shortly. Arrangements have been concluded by which fishing rates on lakes on which fur farming leases will be given, will be reserved and in cases where neighborhood fishing privileges of long standing are concerned, the provincial government will hold the lands under its own lease and will not sub-let.

Southern Alberta will soon be regarded as a hunter's paradise, if the reports made in the Legislature, from members from the South may be taken seriously. First in the session came the depredations of the antelope, the rabbits and the eagle. Next a member from the south, rose to protest vigorously against the ferocious bees that were encouraged to run loose on the range, endangering life and property. George Hoadley was urged to instal "bee-pruners" to ride herd on his highly prized bees. Now this week, the member from Pincher Creek backed by the member from Cardston, rises to protest against the careful preservation of bear, under the new game law. According to these men, bear have worked great havoc amongst the livestock of the foothill country in the south, and they think a bounty on them would be more in keeping than closed season. As a result of the discussion Hon. Hoadley assured them that the new amendments to the game act, gave the government the right by Order in Council, to fix open and closed seasons in any area, according to necessities. So the bears must beware.

**It will pay you before buying a Seed Drill to call on the Massey Harris Agent.**

The Massey Harris Drill is built to last, it has a strong steel frame, heavy I beam, steel gram box, wide steel wheels, and will not sag. All bearings are equipped with Alemite fittings. Alemite lubrication ensures easy running discs. Feed runs are machined, and feed run cups are bolted into the grain box, and cannot get out of place, this ensures accurate seeding. Seed is delivered in the proper place, right under centre of discs. The power lift drills are easy to operate, but are sold with or without power lift.

**A. SILVERTHORNE,**  
Massey Harris Agent, Vulcan

## TURNER VALLEY OIL TENDERS WANTED

Five New Wells Came Into Production—25,518 Barrels of Crude Naptha Produced in February

As a result of five more wells coming into production in the Turner Valley field the situation at Black Diamond has brightened somewhat and if more wells come in the most confirmed pessimist will then be convinced that Turner Valley is a real oil field.

Production at the rate of 7 barrels an hour or 131 barrels per day is what is shown at Macleod No. 1 well since it came in last week. The product is crude naptha and is selling at \$3.95 per barrel and this production is being obtained from gas measuring a flow of 10,250,000 cubic feet per day.

It is also estimated that Macleod No. 2 well is producing 37 barrels per day which makes the output at the two wells about 168 barrels.

Spooner No. 1 well which blew into production recently with terrific force is giving trouble with freezing and tools were stuck fast. The well is down 4950 feet.

Wells feeding oil through the Imperial Oil Company's pipe line to Calgary from Turner Valley produced 25,518.9 barrels of crude naptha and 3,505.6 barrels of light crude oils during the month of February, according to the production report announced from the Royalty office recently. In addition to this oil 430 barrels of crude naptha were taken from the Vulcan No. 1 well and held in the Imperial Company's tanks in the field. At \$3.95 per barrel the crude naptha alone was worth more than \$100,000.

Royalty No. 4 produced 18,287.6 barrels of crude naptha in February, or an average of 633.4 barrels per day as compared with 627 barrels per day in January.

Royalty No. 7 produced 3,076.5 barrels in January. McLeod No. 2 produced 1,380.5 barrels as compared with 1,134 barrels in January, and Illinois-Alberta No. 1 produced 2,674.3 barrels as compared with 3,177 barrels in January.

The absorption plant has been closed down for three months, but on the drip, Royalty wells No. 1 and 2 produced 40 barrels of crude naptha in February.

Under the heading of light crude producers, Dalhousie No. 1 came first with 1,831 barrels. Home No. 1 produced 850, McLeod No. 3 produced

Tenders will be received at the office of the Sec.-Treas. up to March 22 for the position of Janitor for Vulcan School District, No. 1902. Married man preferred.

A. J. FLOOD,  
Secretary-Treasurer.

119.6 and Royalty No. 10 produced 405 barrels of light crudes, making a total of 3,505.6 for the month.

## NOXIOUS WEED ACT

Amendments of the Noxious Weeds Act were carried through the Provincial House this week.

1. Giving the minister power to appoint weed inspectors in municipal districts where the councils fail to make such appointments and to dismiss a municipal inspector for incompetence.

2. Giving the minister power to appoint weed inspectors in all improvement districts, salary and expenses to be paid by the minister of public works out of the funds of the districts.

3. Making it clear that in case of "class B" noxious weeds, the inspector may only destroy the part of the crop infested with such weeds.

4. Providing that settlers moving their effects must make a statutory declaration that they have been cleaned of all noxious weeds adhering to them.

5. Prohibiting any person from shipping any hay or green sheaves into the province without the consent in writing of the field crops commissioner.

4. Prohibiting threshers from taking any machine, wagons and racks across any occupied and cultivated farm without permission of the occupier under penalty of a fine of from \$25 to \$100 and costs.

It is announced that a modern flour mill with a total daily capacity of 125 barrels will be erected early in the coming spring at Radway Centre, by the Krause Milling Company, formerly of Bruderheim. The company proposes to erect its own elevators in connection with the Mill.

**EDITORIAL**  
And now the scientists  
are predicting that soon-  
er or later the weather  
will be regulated by man,  
so folks may have just  
the kind that suits them.  
But they haven't told us  
yet just what kind of  
weather it is that suits  
all of us.

The most generous per-  
son in the world is the  
California man who is  
willing to praise the  
Florida climate. It is  
only fair to say there is  
no such party.

John Doe says: "Every-  
body wonders what  
his wife does with all the  
money he gets and every-  
body wonders why he  
doesn't get more."

**DORA**  
We met a girl so dumb  
the other day she thought  
Joan of Arc was one of  
Noah's daughters.

"Vassar, dat boss ob  
mine am de fastest boss  
in de world! He cud run  
a mile a minute ef it  
warn't fo' jes one thing."  
"What's dat, brudder?"  
"De distance am too long  
fo' de shortness ob de  
time."

**EPITAPH**  
Here lies the body  
Of Archie Burr;  
He went round a corner  
At forty per.

If you can't say some-  
thing good about your  
home town don't say  
anything.

March is the month in  
which you check up on  
your Power wants. Let  
us compare prices, terms  
and power, together with  
saving you money on  
freight.

**WANTED**  
Light Delivery Truck,  
1927 Ford preferred. R.  
J. MONDS, Vulcan.

See our Black-Board at  
the office for Bargains in  
used machinery.

We wish to thank those  
who attended our school  
of March 2nd and hope  
you benefited thereby.

We now have our New  
McCormick Deering Press  
Drill on the floor for  
your inspection.

Now is the time to look  
your machines over for  
repairs—and let's have  
your list that we may  
give you 100% service.

The Citizens' Band is  
certainly all right.

## UNIVERSITY TESTS

Physiological Tests have been Proven  
to be Useful at Outset of College  
Life

Psychologists agree that one's ca-  
pacity to learn is an inherited charac-  
teristic. In individuals differ in intel-  
lectual capacity.

About 2 per cent of the children en-  
tering Grade 1 are feeble minded and  
about 3 per cent. are dull.

Some pupils have mental capacity  
to take them to Grade IV, some to  
Grade VI and about 90 per cent. of all  
students can successfully complete  
Grade VIII.

Through high school the less endow-  
ed gradually are eliminated, and by  
the time a student reaches universi-  
ty, his mental capacity is above the  
average of that in the elementary  
schools.

For the last six years psychological  
tests have been given to the freshmen  
and sophomores at Edmonton, with  
satisfactory results. These establish  
a more or less accurate forecast of  
their progress.

When compared with the test re-  
sults of 26 American colleges, it was  
shown that 75 per cent. of University  
of Alberta students made test scores  
that were above the average obtained  
by the American students. There  
were 5 per cent. fewer weak students,  
and 5 per cent. more exceptionally  
high.

279 students were tested in 1926.  
Later 15 students withdrew from Uni-  
versity for one reason or another.  
These all graded low in the tests. Of  
the Group A, the 20 most proficient  
in the mental tests, 70 per cent. pas-  
sed in all subjects, and only one fail-  
ed in more than one. Of the Group B  
students only 3 were successful, and  
only 4 obtained entrance to the sec-  
ond year.

In November 1927, Group A aver-  
aged 73 per cent. and Group B 53 per  
cent. On a year's work, no Group A  
student was below 50 per cent., the  
highest being 96 per cent. In Group  
B only 6 managed 50 per cent while  
the others fell far below.

This would indicate that these psy-  
chological tests prove useful, at the  
outset of college life.

## FACTS ABOUT ALBERTA

There are a few interesting facts  
culled from the budget presented in  
the provincial House last week. In  
referring to the vast resources of Al-  
berta, Hon. Mr. Reid said the north-  
ern fisheries in 1926 had produced over  
9,000,000 lbs. of fish valued at  
\$867,000. Lumber industry had \$1,-  
000,000 and was capable of great ex-  
pansion; Tourist traffic last year  
brought \$30,000,000 of new money;  
Coal mining industry mined 6,936,780  
tons valued at over \$22,000,000; Fur  
pelts exported in 1927 was over \$4,-  
000,000.

Amongst the names suggested as  
suitable for the big new Lethbridge  
Hotel, the "Hardie" is a popular one,  
in honor of Mayor Hardie.

## TIMELY THOUGHTS

W. S. Morrison of the Olds School of  
Agriculture Submits the Following  
Seasonal Thoughts

When the word "Spring" is men-  
tioned, there flashes before us a men-  
tal picture of bursting flower buds  
and green carpeted fields. The word  
does not suggest to us what we may  
expect at harvest time, and yet the  
year's return may be a direct result  
of our labors during this prepara-  
tory season.

Wheat is now universally recognized  
as the principal farm crop in this  
province. There are many different  
types in evidence, thus we should ex-  
ercise great care in variety selection.  
Among the many standard Spring  
varieties of wheat grown are: Ruby;  
Red Fife; Red Bobs No. 222; Kitchen-  
er; Early Triumph; Marquis; Garnet;  
Renfrew; and Reward. These differ to  
some extent in length of the growing  
season, moisture requirements and  
yield. The effect of the soil and cli-  
mate may influence a farmer to fa-  
vor the production of one, more than  
another. Obviously then, each grower  
must study his own conditions and  
select the variety most suitable.

Experiments have demonstrated  
that under favourable conditions,  
Garnet wheat will mature five to  
eight days earlier than Marquis and  
yield equally as well. Since the ad-  
vent of the "combined harvester and  
thresher," it may be found profitable  
to grow two varieties such as Mar-  
quis and Garnet, on the same farm.  
This would allow the grower to com-  
mence harvesting sooner than he oth-  
erwise would. Such an arrangement  
will also lessen the danger of wind  
shattering the ripe grain, because all  
of the wheat would not be ready for  
cutting at the same time. Another  
advantage to be gained is the exten-  
sion of labour over a longer period,  
thereby relieving the usual rush now  
experienced.

A very important consideration in  
buying or selecting seed grain, and  
one that cannot satisfactorily be  
judged from outward appearances, is  
the ability to germinate and grow.  
Sometimes really fine appearing  
grain is found to be low in germina-  
tion. The only sure way of knowing  
the truth is to make a test. Such a  
test may be conducted in a simple  
way at home, either by growing the  
seeds in soil or between two pieces of  
damp blotting paper. In the average  
farm house, it is difficult to control  
the temperature and moisture so as  
to provide optimum conditions for  
growth. Inaccurate results are often  
obtained from such tests. I would  
therefore, urge every farmer to send  
representative samples of seed to the  
nearest Seed Laboratory to be exam-  
ined for purity and germination.

The idea is prevalent in some dis-  
tricts that it is necessary to change  
seed every few years, in order to keep  
up the standard of our wheat crop.  
Changing seed with neighbors or pur-  
chasing it from a remote district is  
often the cause of bringing in noxious  
weeds and impurities of variety. This  
does not mean that it is never desir-  
able to change. The wise farmer will  
raise a quantity of grain for seed the  
succeeding season on his best and  
cleanest ground. The original seed  
may have been "elite stock" from an  
authorized plant breeding station or  
some reputable grower. Thus it is  
possible for each farmer to raise pure  
seed to select from.

A great deal can be done to im-  
prove seed grain by a thorough use  
of the fanning mill. It is true that  
the fanning mill is powerless to sepa-  
rate a mixture of varieties, but the  
light, shrunken, broken kernels and  
chaff can be taken out as well as  
many small weed seeds. The "disc  
grader," may also be successfully used  
to separate out the wild oats and  
produce a uniformity in the size of  
kernels. Such treatment will make a  
difference of several bushels per acre  
in yield. It will also assist in main-  
taining the quality of the product.

Smut is a fungus disease affecting  
cereal crops. Stinking Smut is the  
common kind found in wheat. This  
parasite reproduces by spores. These  
spores have the same place in the life  
of the smut plant as the seeds of  
wheat have in the wheat plant. There  
are numbers of balls produced on the  
head of the affected stalk. Each ball  
contains myriads of microscopic  
spores making up a black, powdery  
material. The extremely small  
spores are frequently adhering to the  
"brush" opposite the embryo end of  
the kernel.

The disease, however, may be suc-  
cessfully destroyed by treating the  
seed grain with a solution of blue-  
stone (copper sulphate) or formalin  
(40 per cent solution of Formalde-  
hyde) or by dusting the seed with cop-  
per carbonate powder. The first  
method requires the grain to be dip-  
ped, which entails a lot of time and  
labor. Hence it is little used except  
for small quantities. The last two  
methods are in general vogue. There  
are efficient sprinkling machines on  
the market for applying the solution  
of formalin, which speeds up an oth-  
erwise slow, tedious task. By using  
Copper Carbonate powder, the work  
of treating for smut may be done at  
the same time the grain is cleaned.

There are no injurious effects caused  
by leaving the treated grain in storage  
for a considerable time. The chief  
object in treating seed grain for  
smut is to have every kernel thorough-  
ly disinfected.

There are many factors affecting  
the harvest returns. The nature of  
the season is an ever present one.  
The spring may be cold, making the  
crop slow and backward in starting;

or the Fall frosts may come early  
and lower the quality of the grain.  
There may also be a summer drought  
reducing the yield. These are uncont-  
rollable, yet the farmer has many op-  
portunities to assist nature and off-  
set adverse conditions.

Select pure, clean seed of an early  
variety. Use only good, suitable  
equipment, and do so intelligently.  
Seed early on well prepared land, if  
you would expect the best.

## FINE WORK OF R. C. M. P.

The Commissioner at Ottawa report-  
ing on the R.C.M.P. Force, stated  
that on September 30, 1927, the num-  
ber of M.P. in Canada stood at 1004,  
an increase of 61 over the preceding  
year. The work in Arctic and sub-  
Arctic regions is very arduous, calling  
for long and perilous trips in order to  
enforce Canadian law amongst the  
aborigines, to check up on white men  
who peddle dope to the Eskimo and  
Indians and to distribute food to out-  
lying regions. It is the put of the  
way places that most of the R.C.M.P.  
work is done—running dope peddlers  
to earth, protecting survey parties  
from unfriendly Indians in B.C., fer-  
reting out ship deserters, dealing  
with illegal fishing in B.C. waters,  
furnishing escorts for harvest ex-  
cursions, guards for federal government  
money collecting office, and solving  
postal robberies. The work in the far  
north lands also includes the giving  
of assistance to all exploration parties,  
and encouraging any effort to  
make the regions better known.

## TWAIN'S MOTHER

Everybody who has read Tom Saw-  
yer remembers Becky Thatcher, Tom's  
childhood sweetheart. The real  
Becky Thatcher (Mark Twain's real  
childhood sweetheart) is still alive  
and retains vivid memories of both  
Mark Twain and his mother. It was  
from his mother that he inherited his  
gift of humor, and they were contin-  
ually teasing each other. Once when  
he was away, he wrote her a letter  
marked "Personal." She hurried off  
to read it alone, and found that it  
was written in Chinese. She had a  
habit of writing to him on scraps of  
paper, which irritated him immensely.  
Once he got even with her by writing  
her a letter on small scraps of all  
kinds and colors of paper, with out  
beginning nor end—then jumbling  
them into an envelope.

Mark Twain's mother had a great  
love of the spectacular—parades,  
circuses and shows. Red was her fa-  
vorite color and she would have worn it  
constantly if her family had per-  
mitted. She disliked the monotony of  
housekeeping, but contradictorily  
enough, enjoyed quilt making and  
embroidery. She had far more guests  
in her house than she could afford.  
His mother's characteristics gave the  
public a great sidelight on Mark  
Twain's own likes and dislikes. It  
was in these young days that a troop  
of gold seekers en route to California  
fired Mark Twain to set his gang  
searching for treasure in the caves  
round about. Of his father he says:  
"He never had any particular luck  
except that I was born."

## THE FUR INDUSTRY

The fur trade of Canada is in no  
danger of extinction, though certain  
fur bearing animals such as beaver  
and martin are decreasing. Fur farm-  
ing, although as yet responsible for  
only 5 per cent. of the total output, is  
growing rapidly. In 1926 there were  
2819 farms in operation with a total  
value of \$14,888,075. 2517 were fox  
farms, 95 mink, 57 racoon, 107 musk-  
rat and 13 others such as skunk, chin-  
chilla and rabbits. The fur bearing  
animals of 1926 born into captivity  
were 37,912 silver foxes, 1238 crossed  
foxes, 881 red foxes, 466 blue foxes,  
and other animals totalling 5,749.  
The birth rate increased 16 per cent  
over the previous year. The revenue  
gained by fur farmers for the year,  
from live animals and pelts was \$3,-  
194,775.

The Dominion with its cold dry  
winters is productive of the finest  
furs. Great stretches of forests and  
mountains, harbor the animals which  
are the main source of the raw fur  
supply and by conservation and de-  
velopment, the product of these areas  
will long play a vital part in the eco-  
nomic life of Canada.

## AN AGGRESSIVE MOVE

The Saskatchewan farmers in ag-  
gressive action are seeking an enact-  
ment of the provincial legislature by  
which wheat marketing through the  
pool will be made compulsory after a  
75 per cent. sign-up. This was by no  
means an unanimous decision, as out  
of a total 690 delegates, 307 voted for  
the compulsory pool, 263 against it,  
and 120 did not vote at all. The sug-  
gestion has been made, that it would  
be better to attain the 75 per cent.  
sign-up before asking the government  
to do anything about it, and doubt is  
expressed as to whether the govern-  
ment will act upon a resolution which  
was carried by such a small majority.

## C.P.R. 1928 BUILDING PROGRAM

New stations will be built at Hob-  
bema and Queenstown, Alberta, and  
new section houses will be erected at  
a number of different points in the  
province according to the recently an-  
nounced plans of the Canadian Pacifi-  
c Railway for 1928. A coaling plant  
will be built at Vulcan and automatic  
block signals will be installed between  
Dunmore and Medicine Hat. The Red  
Deer terminal will also be extended  
and additional trackage will be pro-  
vided at Calgary and Ogden.

## WESTERN IMPLEMENT CO.

The Western Implement Manu-  
facturing Co. is a new company formed  
in Calgary that will have the good  
wishes of all around Blackie. The  
company will manufacture what is  
now termed the Western Blade Weeder  
and a staff of men are now engaged  
in manufacturing sufficient to  
meet the needs of the farmers who re-  
quire such weeder. It is the inten-  
tion of the company to branch out in-  
to the making of lighter lines of farm  
utensils such as fanning mills, culti-  
vators, etc., as well as blade weeder.  
The men in charge of the project are  
Robt. Wilkinson, president; F. H.  
Elves, vice president and secretary-  
treasurer, and Jos. Ruzalski, factory  
superintendent. The plant is estab-  
lished at 1309 8th Ave., East, Cal-  
gary, and is capitalized at \$50,000.

Norway is winner on the total  
events at the Olympic Sports, United  
States is second, Canada sixth.

### ITEMS OF INTEREST

Hon. Geo. Hoadley's bill for the sterilization for mental deficient went over the top Tuesday night in the legislature at midnight by a vote of 11 against 30 for.

Just wait until the roads get crowded with the drivers of these new cars that are guaranteed to do seventy miles an hour.

Once the freight rate is fixed something should be done to make sure that Alberta coal sent to Ontario is high quality coal.

Blue skies! white fields; sunlit highways beckoning to a winter-weary world—and spring is just around the corner.

The large crop of 1927, has so encouraged the settlers from the dry belt of Southern Alberta, that only 23 applications for transportation are now pending. This was the statement of Hon. George Hoadley. Settlers in the south are now meeting their obligations under special arrangements made for them.

From the Duhamel district comes a report of a cow that is a real cow. The spring calf which she has produced weighed 150 pounds, measured 64 inches from tip to tip, was 37 inches high and her girth was 28 inches. All this at three days old. The ordinary new born calf is 50 pounds. Mother and calf are doing well.

An average of 33.7 bushels of wheat per acre was produced on lands in the Lethbridge Northern Irrigation district in 1927, the total being 1,997,785 bushels on 60,161 acres, according to the annual report of James Pike, Lethbridge Northern Colonization Manager, recently made public by the Government.

D. M. Duggan, Conservative at Edmonton, in speaking at the Legislature said: "Last night my wife, looking at me said: David you are getting to look more like George Hoadley every day." Mr. Hoadley interrupted: "Well isn't that a compliment?" Mr. Duggan said "I regard it as a compliment, but my wife is broken-hearted."

A Company has been organized in Calgary for making western pictures for the British market. The local directors of the Company are A. E. Cross, P. Burns and John McFarland. Under the British motion picture quota law, a certain percentage of the pictures exhibited in the British Isles must be made within the Empire, backed by 75 per cent British capital, and employing British actors.

The annual meeting of the representatives of Municipal Hall Insurance Districts will be held at Sandstone Hall, Calgary, March 21 at 10 a.m., when reports will be received as to the operations of last year and the election of three members to the Board will be held, besides other business. The retiring members are Messrs. Donald Sinclair, D. Ferguson and J. Watson.

The Government at Edmonton is planning \$3,000,000 more this year than last. It costs the province over \$25,000,000 to propel a population of 600,000 people. The question is, are we worth it. This expenditure of course includes the telephone service. It is doubtful if the government will make any change in the policing of the province. The amusement tax will still remain.

One thousand pheasants, and possibly twice this number, will be imported this year by the Calgary Fish and Game Protective Association and will be set out in selected districts to the south and south-west of Calgary. It is announced by C. A. Hayden, president of the association. A number of experiments with this splendid game bird in the southern part of the province have proved very successful and an effort will be made to stock a considerable area adjacent to Calgary.

W. J. Stephens, provincial field crops commissioner, reports that experimental farms and individual farmers are going to carry on extensive experiments with super-phosphates as a fertilizer. In Australia super-phosphates have been used for several years. When sown with grain it increases the yield from three to five bushels. It also causes an extensive root system after germination which tends to fight off the evil effects of a very dry spring. It is believed also that it might hasten maturity. The experiments of Saskatchewan University and of the C.P.R. bear out these experiences, in so far as they have tried it out. A any rate it is well worth testing. It would be used at about 50 lbs. to the acre, which would cost about 90 cents per 50 lbs.

### ITEMS OF INTEREST

Last year airplanes in the Australian service covered more than 500,000 miles without injury to a pilot or passenger.

One hundred years ago the world's largest plum pudding, the Wellington pudding, was made in London. It weighed 450 pounds and took four days and four nights to cook. The question is, was any thrown out.

The influx of immigration has commenced. About 300 settlers have arrived at Winnipeg to enter life in the three prairie provinces. They are mainly British, some German, and some Hungarian, destined for agricultural labor.

A Toronto Company known as the Ontario Alberta Oil Development Co. holds 16,000 acres in oil leases in a tract north east of Suffield, Alberta. Equipment for drilling is at Redcliff waiting favorable conditions to start work.

The prize of \$1000 offered by the MacLean Publishing Co. for the best name for its new Women's magazine has been won by Mrs. Hilda Pain of Elburne, B.C. The name suggested by Mrs. Pain is "The Chatelaine." Over 75,000 names were submitted.

Interest on all farmers' loans issued by the land settlement board in B.C. could be reduced from 7 1/2 to 6 per cent, to aid the agricultural industry of the province, under legislation introduced in the legislature by Hon. E. D. Burrow, minister of agriculture, on behalf of the government.

A tunnel has recently been discovered at Detroit, which it is believed was one of the old links by which southern slaves escaped from the States to Canada. The tunnel is 20 feet below the surface of the street. It is near the "Finney House Barn," which used to be headquarters for slaves seeking to escape across the river.

The Western Canadian farmers have returned from their overseas trip, and are heading home well pleased with their experience. M. R. Marshall of Nanton is quoted saying "Canadian stands to reap invaluable results which will be felt first in increased immigration, increased demand for Canada products and in better and greater production in Canada."

Letter writing while at college is being simplified. At the Northwestern University. Three students have opened a letter shop. They specialize in all standard lines of letters, rising out of student life. Writing home for money is undertaken on a basis of 10 per cent of the proceeds. Love letters are \$10 in advance. Ordinary courtesy letters are \$2. It is said to be a well-paying project.

The message of the Prince of Wales to the people of the British Isles as expressed in an English publication called Canada's Progress is: "Canada—the heart and soul of Canada—the possibilities of Canada—is a reef of precious metal so vast in extent that no man living can chart it, so rich that no man can value it; the deeper you go the more astonished you become at the wealth—material wealth and wealth of character—which you find there."

Figures as a rule are not interesting. But the figures presented as revenue from liquor sales in the province of Alberta, carry the mind in a sweep of speculation. Two million and thirty eight thousand dollars! A power of money. And it is unique in representing a vast sum expended in the pursuit of personal happiness. Who of our citizens are the most generous? Are they the business men, the professional men, mechanics, farmers, day-laborers or the transients? What ever class contributes most should be suitably recognized, because such a sum set loose in a province must be advancing tremendously the general welfare. Supporting it were found that the casual harvest hand in his hours of ease, adds materially to this revenue! Then should the government, not assume the burden of his upkeep when he goes broke from too liberal contribution to his pet charity. The Lethbridge Herald is responsible for this diagnosis: "Every time an Alsatian visits his favorite vendor and buys \$6 worth of liquid joy, about \$2.75 of it goes to the Dominion Government, \$2.25 goes to the Provincial government and \$1 pays for the liquor itself." There is a fund of human interest lying back of this liquor revenue, and it would be satisfactory to learn specifically just who contributes most, and where it sheds its greatest brightness.

### KIRKCALDY NEWS

Mr. Joe Myers spent the week end in Calgary.

Mr. Seivers spent several days in Calgary last week.

Miss Margaret Roebuck who is attending school in Claresholm spent the week end with her parents.

The Girls Club will hold their next meeting at the Community Hall on March 10th.

Mr. Kuykendall left Monday night for Grande Prairie, Alberta, where his wife will join him in a week or two.

Sunday school is being carried on each Sunday morning at 11 a.m. We will be glad for everyone, who will, to come and help us carry on the good work.

Mr. Butler from Claresholm, spent the week end at the Roebuck home.

A birthday dinner was given by Mrs. Seivers on Sunday, March 4th in honor of her husband and herself, Doyle, Marvel, Marie and Mrs. Dunbar, whose birthdays are in one week. Both families with Mr. and Mrs. Kuykendall and Bert Maisey were partakers of this meal and a sumptuous dinner it was.

A farewell party was given for Mr. and Mrs. Gene Kuykendall on Thursday, at the home of Mrs. Dunbar. Games, music and contests were enjoyed by all. Those present were Zella Todd, Marguerite Todd, Mabel Laing, Kathleen Colwell, Belle McFall, Winnie Todd, Freda Dunbar, Mrs. Kuykendall, Margaret Gardner, Gertrude Roebuck, Mr. and Mrs. Blose, Edward Roebuck, Harry Roebuck, Dwight Tuttle, Doyle Dunbar, Harry Peters, Eldon Peters, Keith Tuttle, Bert Maisey, Gene Kuykendall and Lorne Maisey.

### REID HILL NEWS

Mr. S. Hopkins has returned home after an extended visit abroad. It is current report that Mr. Todd will return this summer to the pastorate of the Baptist church.

The seventeen members of the Reid Hill Women's Institute met at the home of Mrs. J. McKay on March 1st, to attend the quilting bee. Two covers were quilted, after which the hostess served a splendid lunch, for which a small fee was charged and the proceeds donated to the flower fund of the institute.

Lethbridge citizens are contributing various names as a suitable title for their new community hotel. "Burdette-Coutts" is suggested as linking two pioneer names. "Lindbergh" is given as being likely to be attractive to the expected American tourists. "Hotel La Femme" is another, in honor of the fair sex, this being leap year. "The Haig Hotel" is also suggested. No decision has yet been reached.

### LOST

INTRODUCES TOMORROW'S VOGUE

**ESSEX**  
Coach \$1195  
Sedan \$1275  
**HUDSON**  
(118 inch wheelbase)  
Coach \$2035  
Sedan \$2145  
Coupe \$2100  
**HUDSON**  
(127 inch wheelbase)  
Sedan \$2320  
Landau \$2605

The resources which achieved and led the mechanical possibilities of the day have been brilliantly employed to create and lead a new mode of beauty, comfort and luxurious appointment.

As dramatic as the first introduction of the Super Six principle which set to days standard for motor smoothness and efficiency.

As boldly original as the Coach, which turned the trend to closed car dominance.

As revolutionary as the companion invention to the Super Six principle, the high compression motor toward which

all builders aim.

With higher, narrower radiator, with vertical shutters, saddle lamps, full crown fenders and low sweeping lines, here is Hudson beauty in gloriously new guise. All bodies are designed in a modern style which is outstanding for smartness. The unity of a design begins at the very front of the car, and carries through to every detail within and without.

And in all models, every value of body and chassis heretofore known, is surpassed. You will agree without hesitation the moment you see them.

A new and glorious thrill is in store for you when you take your first ride in the new Hudson Super Six. A demonstration will be gladly given without placing you under obligation.
